NOTE

Examples are for general information only. Specifications and worksheets are frequently updated. Check with DOTD District Laboratory for the most current worksheets.

TEST PROCEDURES

DOTD is in the process of developing standard, equivalent versions of AASHTO test procedures referenced in this manual. When those procedures are finalized, they are to be used *in lieu* of the AASHTO procedure.

The DOTD *Testing Procedures Manual* is available from the DOTD Materials and Testing Section.

Contact the District Laboratory Engineer for up-to-date information regarding testing protocols.
